DETAILED ACTION

Drawings

The drawings are objected to because Figure 7 (page 6 of 7 of the drawings) shows two figures that should be labeled separately. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, the recitation "a sleeve sized to receive a bar" is vague and indefinite. Is a bar required to be inserted into the sleeve or is it only necessary for the sleeve to accommodate a bar? Similar problems are found in claims 7, 11 and 13.

With respect to claim 11, line 5, "the power switch" lacks positive antecedent basis in the claims.

With respect to claim 13, line 8, "the extension bar" lacks positive antecedent basis in the claim.

"Application/Control Number: 10/003,393

Art Unit: 3654

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-10, 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ostrobrod (U.S. Patent no. 5,975,499).

Ostrobrod, as best seen in Figures 1 and 4, discloses an apparatus comprising: a sleeve 20 sized to receive a bar, the sleeve 24 comprising a nub (the unnumbered collar that abuts member 22); and a movable assembly 14 comprising a spindle and a bracket 26, the bracket 26 sized to fit over either of the bar 24 and the nub, the bar and sleeve further comprising holes which when aligned may receive a pin 28 to secure the bar within the sleeve.

Allowable Subject Matter

Claims 6, 11 and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
